

<b>IO-Link Master USB</b>	<b>IOL1A.1K1341.ZZ1UU1</b>
---------------------------	----------------------------

The IO-Link Master USB is suitable for quick and easy parameterization of devices with an IO-Link interface.

### Characteristics

- Process and service data can be read and written with the corresponding IODD.
- Pin 4 (C/Q) of the master can be operated both in IO-Link (IOL) and in standard IO (SIO) mode, depending on the DTM parameterization.
- Support for all common transmission speeds: 4.8 kBit/s (COM1), 38.4 kBit/s (COM2) and 230.4 kBit/s (COM3).
- Connection of the master via the supplied cable with USB-B mini interface. This is also used to supply the connected IO-Link devices with power.  
For devices with high power consumption (> 2.5 W), the external plug-in power supply unit must also be used.
- The latest version of the DTM is available for download at: [kuebler.com/dtm](http://kuebler.com/dtm)
